

COMMITTEE SUBSTITUTE FOR RESOLUTION NO. 160951

Stating the Council's intention regarding the use of up to \$800 million in general obligation bond proceeds in the event that voters approve authorization of such bonds on April 4, 2017; and directing the City Manager to annually include in the City's five-year business plan a recommendation on the amount of bonds to issue each year and specific projects to be funded.

WHEREAS, the Council has passed Committee Substitute for Ordinance No. 160877, which submits proposals to voters for authorization of \$800 million in new general obligation bonds on April 4, 2017; and

WHEREAS, voter approval of these proposals will provide a new source of funding for basic capital infrastructure including but not limited to streets, bridges, sidewalks, flood control, parks and public buildings; and

WHEREAS, this new source of funding will not be used to cover Airport improvements or the expansion of the Streetcar; and

WHEREAS, the City Manager has recommended a 20-year, comprehensive capital improvements program to the Council inclusive of the aforementioned \$800 million in general obligation bonds; and

WHEREAS, it is the intent of the Council to approve the City Manager's recommended capital improvements plan, which focuses the use of the general obligation bonds' portion of the plan on repairing, replacing, rebuilding, and expanding existing infrastructure; and

WHEREAS, the City charter requires the Council annually adopt a five-year financial plan, as part of their annual business plan, by November 1st each year; and

WHEREAS, the Council desires each year's submitted five-year financial plan include a recommendation from the City Manager regarding the amount of bonds to be issued from the \$800 million within the context of the City's existing and projected financial condition including full consideration of the City's general obligation credit rating and outlook and the effect of the proposed bond issuance pattern on taxpayers, as the principal and interest payments for each bond issue will be paid from property taxes generated from the City's debt levy; and

WHEREAS, the Mayor and Council desire to state their intention concerning the allocation of the bond proceeds, less costs of issuance, in the event that the proposals are approved by the voters; NOW, THEREFORE,

BE IT RESOLVED BY THE COUNCIL OF KANSAS CITY:

COMMITTEE SUBSTITUTE FOR RESOLUTION NO. 160951

Section 1. That the Council hereby states that, in the event that the voters approve the issuance of up to \$600 million in general obligation bonds on April 4, 2017, its goals for the allocation of such proceeds are as follows:

Street Construction and Reconstruction projects shall focus on safety, capacity or reconstruction of existing streets and include bike and pedestrian facilities where appropriate, as referenced in Exhibit A. These projects include traffic synchronization and other complete street concepts as appropriate, including street trees.

Bridge Rehabilitation projects shall focus on those projects which best improve the City's bridge sufficiency ratings so that 90% are rated in good or better condition. Examples of the types of eligible projects in this category that may be funded in part or in whole are:

- Byram's Ford bridge – Over Round Grove Creek
- Gregory Boulevard bridge – Over the Big Blue River
- Benton Boulevard bridge – Over Brush Creek
- E. 12th Street bridge – Over the Big Blue River

Section 2. The projects in the list attached as Exhibit A may change slightly over time as the City implements an asset management system for its street network. Streets needing significant repair may be identified to generate long-term financial benefits to the City if addressed.

Sidewalk projects shall focus on systematically repairing and replacing existing sidewalks without assessment to adjoining property owners.

- For all petitioned projects the City would provide a minimum 50% match for petitioned neighborhood sidewalks where sidewalks do not currently exist
 - Higher City contribution may be available in priority areas (e.g., arterial streets, bus routes, and schools) and a further reduction for benefitting property owners may be made available through pay-as-you-go funding through the capital improvements sales tax
- Funding will also address an estimated 450 intersections that need ADA-compliant curb ramps
- The City Manager will utilize the Full Employment Council job training programs where possible to provide construction training opportunities to individuals seeking job assistance
- Furthermore, the City Manager is directed to stop the collection of outstanding sidewalk special assessment balances if the bonds are authorized by voters

Section 3. A maximum amount of \$150 million of the \$600 million will be allocated to sidewalk projects. The Council agrees to develop a comprehensive plan that includes an assessment of needs throughout the different council districts in order to allocate the available funds. The final distribution of funds will be subject to Council adopting an ordinance that implements the comprehensive plan.

COMMITTEE SUBSTITUTE FOR RESOLUTION NO. 160951

Section 4. That the Council hereby states that, in the event that the voters approve the issuance of up to \$150 million in general obligation bonds on April 4, 2017, its goals for the allocation of such proceeds are as follows:

Flood Control projects shall focus on completing and expanding efforts to protect homes and businesses. Examples of the types of eligible projects in this category that may be funded in part or in whole are:

Projects that leverage federal funds for construction:

- Enshriner's Lake/Brush Creek – Dredge, restore shoreline, raise trail for east end of Brush Creek
- Swope Park Industrial Area
- Dodson Industrial Area
- KC Levees
- Turkey Creek – Hillside drainage

Other Important Flood Control Projects:

- Brookside storm drainage – Prevent frequent flooding
- Westport/Mill Creek drainage – Prevent frequent flooding
- Line Creek – Channel stabilization and modification along East Fork of Line Creek
- Indian Creek – State Line to Wornall Road
- Town Fork Creek – Prevent frequent flooding

Section 5. That the Council hereby states that, in the event that the voters approve the issuance of up to \$50 million in general obligation bonds on April 4, 2017, its goals for the allocation of such proceeds are as follows:

Public Buildings projects shall focus on improving access, extending useful life and in some cases building new facilities and repair of fountains and monuments. Examples of the types of eligible projects in this category that may be funded in part or in whole are:

- KC Animal Shelter – Replace, enlarge, provide serviceable space
- 4900 Swope Parkway Office Building renovation
- KC Museum – Restoration of Corinthian Hall
- ADA upgrades and improvements at City Hall and various park locations including Swope Park and Swope Park Pool

Section 6. That the Council directs the City Manager to include in each year's submitted five-year financial plan and Capital Improvements Plan, a recommendation regarding the amount of bonds to be issued from the \$800 million in general obligation bond authorization. Such plan will also detail the proposed issuance pattern's effect on the City's financial condition, general obligation credit rating and the impact on property tax rates and taxpayers.

COMMITTEE SUBSTITUTE FOR RESOLUTION NO. 160951

Section 7. The Public Improvements Advisory Committee (PIAC) shall review and comment on the City Manager's recommendations to the Council on the projects to be funded in each bond issue. Recognizing that there are needs throughout Kansas City, use of bond proceeds should be fairly distributed city-wide.

Section 8. Directing the City Manager to implement a Community Benefit Agreement Plan in conjunction with construction and reconstruction of each project exceeding \$300,000.00, which will support local workforce development and employment opportunities, particularly among historically underrepresented groups, and continuing to increase the number of local, women-owned, and minority-owned business firm contracts with the City relating to infrastructure projects.

Section 9. That the City Manager is directed to provide to the Council an annual report, summarizing the use of the bond proceeds for the previous 12 months as well as a report with a list of projects anticipated to be completed each year.
