DIVERSION STRUCTURE 068 DETENTION BASIN AND SEWER REHABILITATION PROJECT

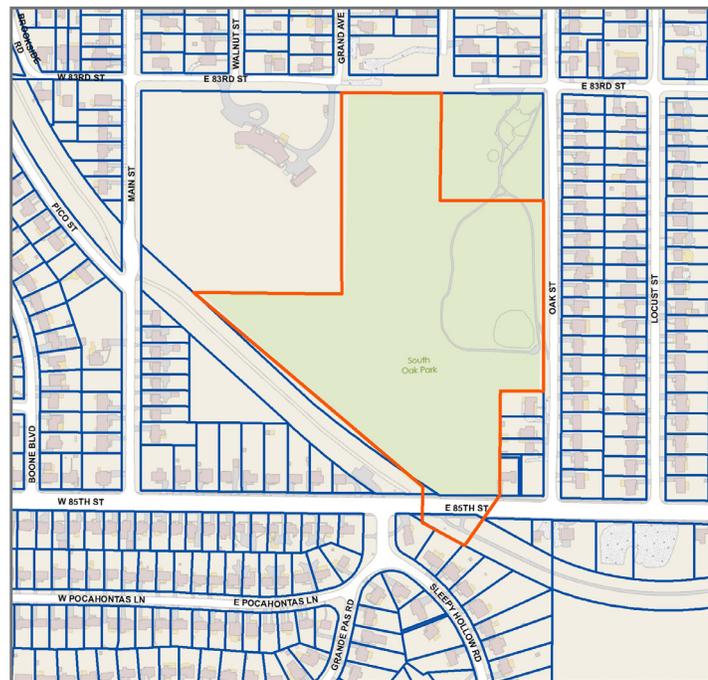

CONSTRUCTION SCHEDULED FOR: MARCH 2019 – DECEMBER 2020

The City of Kansas City, Missouri is working to construct important improvements to the stormwater collection system in your neighborhood, including replacement/realignment of the existing sewer system and the construction of a detention basin within South Oak Park. When complete, this project will help protect our community's environment by reducing the amount of combined sewer overflows entering waterways in South Oak Park.

PROJECT AREA

THIS PROJECT IS LOCATED
WITHIN SOUTH OAK PARK.
THE BOUNDARIES ARE:

- NORTH: E. 83RD STREET
- SOUTH: E. 85TH STREET
- EAST: OAK STREET
- WEST: MAIN STREET

DIVERSION STRUCTURE 068 DETENTION BASIN AND SEWER REHABILITATION PROJECT

WHAT'S BEING DONE?

This project will eliminate an estimated 2 million gallons of combined sewer overflow in South Oak Park in a typical year. It will also remove more than 40,000 tons of trash from the existing landfill in the park. Project improvements include the replacement and realignment of the existing sewer system and the construction of a 3 million-gallon open detention basin. The detention basin will capture combined sewer overflows during heavy rain events (which typically occur fewer than 10 times per year) so that the sewer doesn't overflow into waterways located within South Oak Park. The basin will make a controlled release back into the combined sewer collection system within 24 hours after each storm's passing.

Trail enhancements, including connecting the park to the Trolley Trail with a pedestrian footbridge, are also proposed.

WHAT'S THE TIMELINE?

Construction is anticipated to begin in March 2019 and end in December 2020.

WHAT CAN YOU EXPECT?

We appreciate your support and patience as we work to complete this important community project. The work is set to occur within South Oak Park, but disruptions may affect nearby residents and include:

- Large equipment creating noise and dusty conditions
- Temporary street, lane and sidewalk closures
- Tree clearing on the western side of the park
- Temporary closures of South Oak Park trails and ball field
- Temporary closures of the KCATA Trolley Trail south of Main Street

WHO'S DOING THE WORK?

The City of Kansas City, Missouri will be assisted by George Butler & Associates for the construction-phase services of this project. The construction contractor has not yet been determined, and will be selected through the City's open bid process.

WHAT'S THE CONTRACT AMOUNT?

The budget for construction is \$8,500,000.

WHAT'S THE "CONSENT DECREE"?

In 2010, the City of Kansas City, Missouri entered into a Consent Decree with the United States Environmental Protection Agency to reduce the volume and frequency of overflows from the City's sewer system. Kansas City's Smart Sewer program is a 25-year plan to address this challenge. The Diversion Structure 068 Detention Basin and Sewer Rehabilitation Project is one piece of the Smart Sewer program, and is required by the Consent Decree to be completed by December 31, 2020.
