

## Encampment Prioritization Matrix

Determinant of Grievous Injury and/or Premature Fatality		Likelihood of Grievous Injury and/or Premature Fatality				
		Low	Minor	Moderate	High	Critical
<b>Domain</b>	<b>Criteria Examples</b>					
<b>Health</b>	Vulnerability of people living in the encampment					
<b>Safety</b>	Violence, drugs, fire, animals					
<b>Environment</b>	Type and amount of garbage and debris					
<b>Location</b>	Location of camp, number of people using the camp, structures, community and neighborhood involvement					

Encampments are prioritized based on the **highest risk for grievous injury and premature death** of people residing in the encampment and people living in the surrounding community.

Priority is determined by the combination of scores received in each domain.
