

# Vision Zero KC

In May 2020, KCMO City Council passed the [Vision Zero resolution](#) to eliminate traffic fatalities and serious injuries on our streets by 2030, while increasing safe, healthy, equitable mobility for everyone.

## Goals for Vision Zero KC

- Create safer streets for everyone, in all neighborhoods.
- Eliminate traffic fatalities and serious injuries by 2030.
- Implement low-cost, high-impact pilot projects to evaluate outcomes and gather feedback.
- Develop a multi-year, comprehensive Vision Zero Action Plan to integrate Vision Zero practices into every aspect of planning, design and engineering.

## Year One Plan

The first year of the program is focused on rapid, low-cost, high-impact pilot projects to reduce speeds and improve safety for all modes of travel. Projects include:

**Intersection Improvements:** at 6+ pilot locations based on high crash and injury rates.

**Traffic Signal Upgrades:** at 50 locations citywide to improve pedestrian safety, giving more time to cross the street.

**Protected Bike Lanes:** a build out of 30 miles of bike facilities over the next two years focused on connecting the existing network and on high-injury corridors.

**Neighborhood Traffic Calming:** at 50 locations to slow traffic down on neighborhood streets. Locations were selected based on traffic crashes.

## Vision Zero Action Plan

KCMO staff and the Vision Zero Task Force continue work on the multi-year, Vision Zero Action Plan that will outline strategies and tactics to inform Vision Zero projects in the future.

Raised crosswalk at 29th & Charlotte in the Longfellow Neighborhood.

## Engaging in Vision Zero:

1. Visit the Vision Zero webpage
2. [Take the Vision Zero Engagement Survey](#)
3. [Submit your ideas or areas of concern in the Vision Zero Engagement Map](#)
4. Attend an upcoming public meeting
